## OUR MISSION

Our Association, Mám Dron, is fully aware of the enormous potential of unmanned aerial technologies and their deployment in numerous industries and services. Abroad, this topic strongly resonates across various professional international and local conferences and trade fairs, as a sign of the current rapid development of the domain.

Slovakia still lacking this type of event, we believe that the DRONTEX Conference will fill this gap and offer room for communication and cooperation of professionals in production, distribution and services related to UAV.

We have designed the DRONTEX Conference as a one-day event divided into three thematic blocks with the keynote speakers being professionals in the fields of unmanned aerial technology development, unmanned aerial operations management, and representatives of companies providing UAV applications for surveying, cartography, energy and services.

If this inaugural conference proves successful, we aim to follow the trend, and create a tradition of events with high added value for the entire drone community in Slovakia.

**Rastislav Sopko**

President of the Mám Dron  
Association

# EVENT INFORMATION

## Date

**Thursday, Oct 20th, 2022**

(to be confirmed)

## Capacity

**150 participants**

## Target audience

- Unmanned aerial technology professionals
- Representatives of companies providing professional UAV services
- Representatives of cartographic, geodetic, construction, and energy industries
- Representatives of state institutions (MDaV SR, MO SR, MH SR, MV SR)
- Representatives of local governments (ZMOS)

# OBJECTIVES

Create the first professional event format for unmanned aerial technologies in Slovakia

Create a platform for professional discussion and experience sharing

Publicize the use of UAV for the common good

Assist in opening opportunities for the development of UAV-related economy within the country

# PRELIMINARY AGENDA

## Introduction

- Arrival and registration of the participants
- Introductions and welcoming of the participants - the Mám Dron Association
- Address by the Conference Ambassador
- Presentation of the Mám Dron Association and its activities

## TOPIC 1: Legislation and management of the unmanned aerial operations

- EU strategy in the UAV 2.0 domain to support sustainable and smart mobility
- Global UTM Association
- U-Space implementation strategy in Slovakia
- Upcoming changes in regulations for UAS operations
- Position of ANSP in the management and planning of UAS operations
- Integration of manned and unmanned aerial traffic
- Panel discussion

## TOPIC 2: The use of UAV in industries and services

- Efficiency of UAV in power line surveys
- UAV applications in geodesy
- UAV data collection and processing for cartography
- UAV applications in agriculture
- Autonomous UAS operations in logistics

## TOPIC 3: Technological innovations for manned and unmanned aerial systems

- „Drone in the box“ as the next step towards autonomous operations
- Direct remote identification modules
- Presentation of the eVTOL concept
- Closing statement, summary and the next steps (declaration)
- Networking

# PARTNERS

## Become a partner of the UAV economy development in Slovakia!

Technological development of unmanned aerial technologies and sensors allows for more efficient, accurate, and cheaper data collection in energy, construction, geodesy, healthcare and many other sectors. UAV not only successfully demonstrate their potential in entrepreneurship and economy development, but also contribute significantly to the protection of the environment. As DRONTEX Conference partner, your brand will become a part of this rapidly developing segment that, on top of industry and services, promises to impact significantly the personal transport and transport of goods in the near future.

## Partnership benefits

### Gain exposure!

The DRONTEX Conference is the first of its kind in Slovakia! Therefore, as its partner you will gain exclusivity in the domain of safe and efficient use of UAV for the common good..

### Build your brand!

As a partner of the DRONTEX Conference, you and your brand will become interconnected with the latest technological domain positively perceived by a broad target audience.

### Become a partner of the future!

Drones are the future! This has been proven by the rapidly growing investment in the segment of eVTOL vehicles, as well as the new opportunities where drones clearly display their efficiency and environmental friendliness.

### Become a patron of the community!

The community of UAV experts and enthusiasts in Slovakia is growing every day. Your support will contribute significantly to the increase the positive motivation of individuals and companies to further develop drone flying in Slovakia.

MAMDRONSK

# THANK YOU FOR YOUR ATTENTION!
